Department of Health Services Children's Medical Services Network (CMS Net) - Information Bulletin # 56

The new E47 SAR process has been successfully installed into the Production environment of CMS Net Web. However, it will not be available for use by the Counties and Regional Offices until Thursday, July 1. This will allow the CMS IT staff additional time to establish user security assignments and finalize implementation plans.

A **modification** to the CMS Net Web application was required after training was completed. This change reversed the definitions and use of the Units and Quantity fields. The CMS Net Web application was updated with the following new definitions for Units and Quantity.

- **Units:** The total number of times a procedure or service is requested. For Pharmacy Providers Only: Enter the total number of times the authorized quantity is requested (example: a unit of "3" would be the original plus two refills).
- **Quantity:** Only for Drug codes. Enter the total number of tablets, capsules, volume of liquid (in mls) or quantity of ointments/creams (in grams).

Also note that the Production URL address listed in the CMS Net Web User Guide and Reference manual is incorrect. The correct URL address to access the CMS Net Web application is: <https://cms.cahwnet.gov/CMSE47/login.jsp>

An updated copy of the CMS Net Web User Guide and Reference V1.1 has been placed on the CMS website at: <http://www.dhs.ca.gov/pcfh/cms/ccs/cmsnet/> . The CMS Net Web Provider Security Management and Role Assignments Manual has been placed on the CMS net website as well.

Counties and Regional Office staff may continue to practice in the CMS Net Web training area during this time period. The URL address for the CMS Net Web Training environment is: <https://cmstrnw.cahwnet.gov/CMSE47/login.jsp> .
